

AIR SPLICING IN COMPOSITE and TECHNICAL TEXTILES

Code 110M / 110R

Jointair Splicer

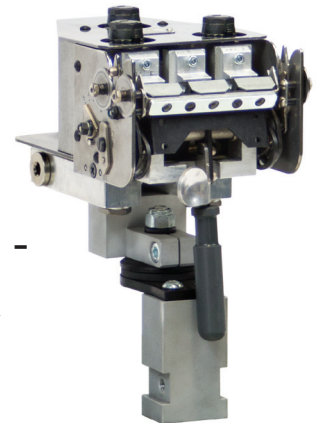

Fine Filament Yarns
up to 4000 dtex

Code 124

Jointair Splicer

Aramid, Carbon Yarns -
High Splice Strength

Code 116K

Jointair Splicer

Glass Rovings, Carbon
Yarns, Aramid Yarns
up to 3000 TEX

Code 116G

Jointair Splicer

Heavy Glass Rovings,
Carbon Yarns, Aramid
Yarns up to 5000 TEX

Air Track Supply (ATS)

A.B. Carter, Inc. Jointair Splicers can be track mounted for best splicing performance and minimum maintenance. These systems keep hoses out of operating areas and give maximum freedom to the operator.

The **Air Track Supply (ATS)** system shown here contains the air hose inside the track. Track mounting location depends on machine configuration. Tracks can be mounted at the top or bottom of the machine, and different splicers can be used.

Models are available to suit different machine applications - such as creel and twister installations.

Moveable Trolley System
